

# NRS1442: Fundamentals of Nursing Practice II

**Credit Hours:** 4

**Clock Hours:** 40/30/35

The Fundamentals of Nursing Practice II course continues the student's introduction to professional nursing in healthcare systems. In this course, there will be an emphasis on performing basic nursing skills using proper techniques and measures to promote safe, quality client-centered care. Additionally, students will demonstrate therapeutic communication in patient care. Students will also be introduced to the essential concepts of clinical judgment and critical thinking in the healthcare environment. Upon completion of this course, students will have a strong foundation to build upon in their nursing school experience.
