

PCTA1310: Nurse Assistant Skills

Credit Hours: 3

Clock Hours: 80/40

This course is designed to supply the student with information pertinent to their role as a member of the health care team. It combines lecture and hands-on lab time under the direct supervision of a Program Instructor to provide the trainee with the basic knowledge and skills needed to meet a patient's health needs. Emphasis is placed on basic human needs, safety factors, caring, the appropriate use of medical terminology, as well as planning and implementing patient care skills.
